

## Competition Catalogue

*Discover your true potential*

Dear shooters and hunters,

it is with great pleasure that I extend my personal welcome to our new catalogue to all of you.

I hope you will find it complete and easy to read through. We are very proud of the growing interest for the Zoli brand and feel it is time to improve the quality of our communication. The objective is to get the public to know our company and our products with ease and clarity.

We are very happy and feel rewarded that an ever growing number of people are using our guns with satisfaction and manage to achieve better results than ever before. This is a very engaging notion and an incentive to continue our work with tenacity and dedication. A commitment that presents difficult challenges but is well compensated by the many victories accomplished at national and international level by our loyal clients.

We firmly believe that innovation and tradition can and must coexist, and it is for this reason that while our products are technologically advanced, they still maintain universal principles that belong to the most classical gunmaking tradition. As a result, Zoli's guns are highly evolved as far as materials and technology are concerned but offer a very classical, highly refined design. We are very proud to introduce you to the

latest generation of guns, researched and built on the basis of a simple philosophical concept: quality must never be compromised or sacrificed.

The Z-Gun line is the embodiment of such concept. Beside the exquisite and satisfying look, as well as the well-tested longevity, the Z-Gun line hides an uncompromising technological approach that manages to combine the best ballistic performance with an incomparably low recoil.

Shooters and hunters who have been using Zoli's gun for some time have already tested and appreciated the characteristics that make our products unique. Our success is also due to the generous and positive influence afforded by those who, following their experience with our guns, feel the need to share their satisfaction with enthusiasm and persistency.

Their endorsement has strongly supported the diffusion of our brand, making it reach such a level of fame and prestige to take it to the top market segment.

I wish you all a pleasant and interesting browsing of our catalogue.

Thank you and warmest regards,

*Paolo Zoli*

## Where does the ZOLI quality come from

The origin of Antonio Zoli Spa finds its roots in the historical and cultural context of the post-war period following World War II. A real embodiment of the typical entrepreneurial spirit that marks people from the area around Brescia, Antonio Zoli played an active part in the rebuilding stages following the war's events that also involved the valley of the river Mella, where the company is located, placing the first steps for a business that would have shortly projected his name on the markets around the world. Antonio Zoli was born in 1905, his father Giuseppe built flintlocks in his shop in Magno, a small village (hamlet of Gardone Val Trompia) perched on the mountain above the present company's location, the place where several famous gunsmith families come from.

Since the 14th Century, Magno was highly appreciated for its gun production, destined to the governments of Venice, Piedmont and Naples. From archive research, the Zoli family was already active in Magno in 1490, where they were involved with the local artisan scene, flanking the early arquebus makers, masters of rare sensibility, in the manufacturing of firearms, in the first decades of the 15th century. In the following centuries, the activity of the Zoli family consolidated even more, so much so that in 1867 Giovanni Zoli becomes a renowned flintlock maker. Proof of his activity is found in an exquisite

muzzle-loading pistol depicting the family logo and presently stored in Zoli's gunshop, a symbol of the en-

terprising spirit and determination that the valley developed through the centuries. Reading thorough the Zoli family history is like reading through the series of events that involved the Val Trompia area and its population, responsible for instilling in Antonio Zoli those values and traditions that are still perceived as indissoluble today. Captivated by the appeal of the valley and the strong passion inherited by his parents for guns and the precision mechanics it took to build them, the beginning of Antonio Zoli's career saw him collaborating with the main companies in the gun sector. In October 1945 he started his own

business, taking him from appreciated gunsmith to become one of the most relevant industrial activities in the area. The company then changed structure also thanks to the contribution of Antonio's sons, who provided further impulse in terms of product quality and market approach, with excellent results. From guns made with high quality components, according to the classical parameters employed by master gunmakers, the production was later integrated by guns with smooth bore barrels, with hammer or hammerless, over-and-under and side-by-side.

Always available to satisfy any market requests, Antonio Zoli Spa developed an awareness for new trends since the very early years. In 1956, it was the first company in the world to build replicas of old muzzle load guns, marking the start of a new market that would become extremely important.

Among the main achievements, in the 1960s Antonio Zoli Spa was also the first company in Italy to industrially manufacture combination guns, breaking the monopoly held by gun makers in central Europe.

A few years later, over-and-under and side-by-side express guns were added to the catalogue, as well as bolt-action guns, a production that reached thousands of units, both in the hunting and varmint version. At the beginning of the 1990s, following the success achieved across all markets, Zoli decided to make a range of Drilling guns called MG-92. This step represented a new challenge, making

Zoli compete with long-established, well-known manufacturers from Eastern Europe. The product launch was a blazing success, so much so that the production lasted for more than 20 years. Zoli Drilling (2 smooth bore barrels, one rifle) remains today the only example of a similar gun ever to be industrially manufactured in Italy.

At the end of the Millennium, under the new direction of Paolo Zoli, the company took on a great new challenge in the over-and-under segment. The new project was called 'Classic Revolution 4' as it included four types of over-and-under guns: Skeet and Hunting smooth bore, Ex-

take direct control of the whole production line, from planning and researching to product sale.

In recent years, the company has achieved amazing results in various shooting disciplines, winning national and international championships with a progression that clearly shows the extremely high ballistic and dynamic qualities featured on Zoli's guns. In the wake of these triumphs, Zoli successfully developed a custom shop that has managed to satisfy even the most demanding requests.

The incessant appreciation shown through the years by loyal customers is the best endorsement to Zoli's work, as well as their consoli-

press and Combination rifles. Thanks to this project, the company has today reached the objective of placing their products in the highest market segment. In fact, all four guns present technical characteristics belonging to top quality firearms and produced in limited quantities.

At the beginning of the new Millennium, production methods, techniques and technologies have undergone a dramatic change and thanks to this constant development Zoli today can

dated presence on markets all over the world. The traditions of a family business, now in its third generation, have managed to adapt constantly to technological innovations without altering the love a craftsman feels for the products they manufacture.

It is thanks to this rich history that Zoli can today be proudly named among the few businesses offering a wide range of prestigious products that are planned, researched and produced in their own factory.

# Zoli Classic Revolution

“Classic Revolution” is the name of a challenging, rigorous and uncompromised project ZOLI embraced a few years ago. In this section you will learn about the most important technical features of all ZOLI over and under shotguns which have made this project extremely successful.

Through its “Classic Revolution” ZOLI has strengthened its presence in the Highend worldwide market with a better image and a stronger presence on all international markets.

All Zoli guns are fitted with the Hand Detachable Zoli designed locked system. Hand fitted by capable Gunsmiths are loaded with powerful coil springs.

All Z-Guns series trigger mechanism has all critical parts Titanium nitrate treated and main coil springs coated with self lubricating material for maximum corrosion resistance and wear. Hammers, Sears and trigger plates are precision CNC machined, specially hardened and ground. Trigger plates are easily adjustable fore and aft.

## Barrel soldering

Zoli was the first company in the world to develop an industrial process to silver solder shotgun and rifle barrels. This technique guarantees the most precise and durable joining of barrels compared to the more traditional approach which employs tin alloys. Further advantages entail a more homogeneous assembly providing a drastic reduction of micro-vibrations leading to reduced recoil when shooting and the ability of guaranteeing point of impact. In addition highly durable chemical blueing can be used to maintain the look of the gun for years. Today all barrels at Zoli are made with this exclusive technique.

## Forged Components

The action, trigger plate and monoblock form the foundation of the gun. Such components are all made using forged alloy steel. Amongst these components, the new solid action is the most important and innovative. Because the trigger plate mechanism is completely independent from the action, it does not sustain the stress and strain that could affect the adjustment of the firing mechanism. High adjustment standards are therefore guaranteed even under prolonged heavy use. The detachable trigger mechanism also facilitates easy maintenance. Each and every machined part is jewel checked for correct dimensions.

## Percussion system

Zoli's percussion system has been designed to the highest safety standards that technology can offer. The firing pin is guided by a specially made bushing that ensures its perfect operation. The bushing is also provided with vent holes, to allow any gas produced by the accidental perforation of the cartridge primer to escape, without damage to the gun or injury to the user.

## Barrels

Zoli have manufactured guns for more than 70 years and we have manufactured our own barrels in house for more than 55 years. The ballistic performance of our barrels is legendary and the envy of all shotgun manufacturers. Our extensive experience has always been underpinned by ongoing research making it possible to ensure matchless ballistic performance with a reduced recoil. Our years of intense ballistic and materials testing enables us to provide superior pattern distribution with higher energy yet softer recoil. Only Zoli barrels achieve this success. We simply put our barrels up against any others-any time.

## Locking System

All guns are equipped with a particularly robust locking system. This consists of a split locking bolt that mates accurately with the locking lugs of the monoblock. The central position of the locking system compared to the monoblock axis ensures maximum tightness. Such a design requires the employment of spark erosion [EDM machining] techniques that allow extremely close tolerances. When shooting, the joint between barrel and action is maintained over a long period due to the axis pins being positioned in the lower part of the barrel itself and the bottom lug engaging with the action body.

## BHB System

The Zoli BHB Stock Grip and Barrel Weight system is the first real dynamic adjustment system specifically designed for a shotgun. The function of the Zoli BHB Stock Grip and Barrel Weight system addresses the positions of the weight and the amount of the weight that balance the shotgun in order to create the optimum dynamic control

of the shotgun at the desired balance point. A same balance point on the shotgun can have different dynamics. A dedicated dynamics affect shooter performance differently i.e. a better control!

The ideal dynamic of a shotgun will vary depending on the individual characteristics of the shooter, taking into account variables such as height, weight, strength, competence and individualized mechanics.

## CUSTOM SHOP

Zoli Antonio has been building Sporting firearms since 1945. As we are passionate about what we do we never stop researching and we believe that innovation and traditions can or rather must coexist.

Our products are technologically advanced but respect all the most important gunmaking principles. Our products are revolutionary from a mechanical standpoint but classic in look and design. They reflect the principles of gunmaking that generated exquisite pieces in the past, real works of art skilled craftsmen could produce for the joy of only very few people.

Since 1980 the Zoli Custom Shop has built sporting firearms that range from the fine to the fantastic. Zoli custom firearms have been crafted for and with the input of the finest hunters and shooters. Our masterworks line is geared toward the creation of products able to satisfy the most demanding palates. All this is made possible by combining the most modern technologies to the refined finishes and details, typical of the highest tradition of gun making.

# Z-GUN RIBS & VERSIONS

Barrels length available on 71 - 75 - 78 - 81cm. (86cm optional) // 28"- 29,5"- 31" - 32" (34" optional)

## FR

### Flat rib

The Flat rib versions are supplied with a tapered top rib or parallel rib, fully checkered, in keeping with the more classical tradition. Thanks to a choice of several barrel lengths and stock configurations, this version will satisfy any specific request. Barrels, all entirely silver soldered, affording a softer, more gradual recoil in spite of the extreme ballistic performance. The recipe we use to make these barrels is the outcome of over 50 years of experience we have acquired thanks to our in house production. Barrels are supplied with interchangeable extended chokes and on demand are available with fixed chokes option. The stocks are made of selected Turkish walnut wood, finely checkered and oil polished. Flat rib version is available in 12, 20, 28 and 410 gauge. 20ga version can be supplied with an extra set of barrels in 28ga or .410

Barrels length available on 75 - 78 - 81cm. // 29,5"- 31" - 32"

## MR

### Mid rib

The MR version is identifiable thanks to its medium height, fixed tapered rib: a small but very important detail that contributes to achieve a more relaxed neck position when shooting. Extra interchangeable barrel sets are also available on request. The action can be finished in a long-lasting, anti-corrosion silver or blued. The standard stock is an adjustable Off-Set, designed to adapt perfectly to the above rib style. The wood is selected Turkish walnut, finely checkered and oil polished. The Z-Sport MR is available only in 12 gauge.

Barrels length available on 75 - 81cm. // 29,5"- 32"

## HR

### High rib

Every aspect of the HR has been planned to achieve the highest level of performance in order to break the target when sport shooting. The sense of familiarity immediately perceived is very powerful. The HR model naturally leads your eyes to the target, offering a perfect view that translates into a significant reduction of discomfort for neck and shoulder. The low recoil sensation is due to the action low profile, achieved also thanks to the Boss-type lock, that moves the gun's central axis to a higher position. HR is fitted with a new, 11 mm or 16mm, adjustable tapered or parallel rib (only on 75cm - 29,5") that thanks to a simple washer can adjust the impact point from 50/50 to 70/30. The barrels dynamic approach and silver soldering, completed with an impact point factory warranty, are Zoli's key success element, delivering a shooting experience with low recoil and requiring minimal effort and less eye strain. The standard stock is an off-set Monte Carlo, offering ideal pitch and slightly rounded comb combined with an embossed pistol grip: a comfortable stock, ideal to make the most of the high rib.

Barrels length available on 86cm. 34"

## TRAP<sup>US</sup>

The Z-Trap US model is the version dedicated to the practice of Trap. Living up to the uniqueness offered by their barrels, known to provide a ballistics reference Zoli has designed Trap barrels providing them with a rib able to offer infinite adjustments in customizing the ideal point of impact. Different from any other product offered from the market the Z-Trap US rib can be adjusted both in parallel position on different levels of height that tilted to various degrees of angle. These adjustments are made possible by the fact that the rib, contrary to what is offered by all the other products currently available in the market, is not anchored to a fixed point. A very sophisticated engineering solution that provides, amongst other things, a system of recoil absorption built into the rib itself. To shoot with Z-Trap US is a unique experience. Alongside the ballistic quality there are ergonomic and comfort benefits immediately perceived by the shooter and able to reduce to a minimum level the stress caused from the time of shooting to benefit both shooting pleasure and the result. The offset Monte Carlo style stock with the ideal pitch and the slight rollover comb combined with the right or left hand palm swell makes this stock the most customized but still standard stock of all high rib guns.

## Z-SPORT

THE BEST SELLER

The Z-Sport model is the version dedicated to shooting sports. The engraving is clean and essential, decorated by an ornate border. The Z-Gun logo is in relief on a non-glare stipple top, on both action sides and back.

The barrels of the Z-Sport model are supplied with a tapered top rib, fully checkered, in keeping with the more classical tradition. Thanks to a choice of several barrel lengths and stock configurations, the Z-Sport

version will satisfy any specific request.

An extra set of interchangeable barrels is also available on request, as well as a choice between a frame finished in long-lasting, anti-corrosion silver or blued. The stocks are made of selected Turkish walnut and finely checkered and oil polished.

The Z-Sport model is available in 12 or 20 gauge. 20 gauge models can be supplied with an extra set of barrels in 28ga and .410 .

## Z-EXTRA

TIMELESS ELEGANCE WITH  
DYNAMIC COMFORT

Every aspect of the Z-Extra HR has been planned to achieve the best performance to break the target in sport shooting. The sense of familiarity immediately perceived is very powerful. The HR model naturally leads your eyes on the target, offering a perfect view that translates into a perceivable comfort for neck and shoulder. Model Z-Extra HR is fitted with an 11 mm, adjustable tapered rib that, thanks to a simple washer, can change the impact point from 50/50 to 70/30. The standard stock is an off-set Monte Carlo, offering ideal pitch and slightly rounded

comb combined with an embossed pistol grip: a comfortable stock, ideal to make the most of the high rib. The success of Zoli HR models is mainly due to the perfect match between the barrel/stock assembly and the shooter.

Model Z-Extra has an English style engraving mixed with some scrolling.

The Z-Gun logo, a gold inlay on both action sides and back, pleasantly stands out against the antique silver of the base. This finishing combined with a durable protection ensure a high degree of corrosion resistance.

## Z-BELLA

DESIGNED FOR HER

Zoli, have spent two years developing a brand new ladies' shotgun, the highly-anticipated Z-Bella. Specially designed to meet the requirements of the female form, the gun is carefully embellished with eye-catching Swarovski crystals.

The Z-Bella is attractively presented, without sacrificing the technical nature of a product dedicated to competitions.

All stock dimensions have been specially adapted to cater specifically to the structural needs of the female form, including the pistol grip, drop, length of pull, pitch and cast, with each stock equipped with an adjustable comb, for the finer finesse.

Available in 12 gauge, the Z-Bella comes in a flat tapered rib with a choice of 28, 30 or 31 inch barrel lengths, and with five interchangeable flush fittings or 3/4 inch extended chokes. Upon request, the Z-Bella is also

available in a mid-step rib or in a high adjustable rib in 30 inch barrel length.

The Z-Bella is offered with either a silver or black action, boasting elegant deep scroll engraving to the frame, tastefully embellished with Swarovski crystals.

The Z-Bella comes equipped with BHB (Between Hands Balancer) in the pistol grip, a dynamic corrector used to customize and tune both balance and swing dynamics of the shotgun. Around the BHB stock, Swarovski crystals encircle the iconic Z emblem, a symbol of the prestigious Zoli Z-gun range.

As in any Z-Gun product, Z-Bella is equipped with a Boss type locking bolt, monolithic frame, silver soldered barrels, removable trigger mechanism with titanium coated components and self lubricating springs and bushed firing pins.

## Z-XL EVO

THE ONLY ACTION IN THE WORLD WITH  
VARIABLE WEIGHTS SYSTEM

Model XL-EVO has the difficult task to complete the already comprehensive Z-GUN range dedicated to competitions. An objective that can be considered achieved if we think that not only does XL-EVO represent all the fundamental aspects that distinguish the whole range and declared its success, but it also reaches beyond by expanding them further. For this reason, XL-EVO is a gun dedicated to the expert shooter requiring a professional, as well as customizable gun. A truly unique model on the present trade scene.

Unlike the rest of the range, XL-EVO is fitted with an increased action which has a structure planned so that its weight can be varied. This is a very intriguing aspect considering that the shooter can carry out this simple modification him/herself.

The two side plates can be exchanged with others of a different weight. This innovation

completely reflects the concept 'Between Hands' introduced by Zoli, affecting not only the weight located in the center of gravity but also intervening on the gun dynamic approach, without distorting it.

When shooting at professional level, having a gun that can be perfectly tuned is essential. Model XL-EVO has been planned to fulfill such request thanks to the variable weight of the 'VGC' action, to the dynamic 'BHB' device and to the stock with adjustable comb.

XL-EVO is also fitted with a monolithic action, detachable trigger group with titanium components, self-lubricating springs, stainless steel bush firing pins, Boss-type locking system and silver soldered barrels.

XL-EVO is available in 12 gauge with different barrel lengths and 4 types of rib.
