Z-GUN HR

The Zoli **HR** Competition shotgun has been designed in every facet to be a performance driven, reliable target crusher. Created to win using the best of technology innovation & old world craftsmanship. Ergonomic between the hands balance, focused pointability and ease from first to second target acquisition make this Italian thoroughbred designed specifically to become one with the shooter.

Heads up bio-mechanical comfort design focuses your eyes on the target for greater visibility while reducing neck and shoulder fatigue.

Less felt recoil due to low profile Boss-type locking system & engineering born innovation translates to a straight line recoil path. Adjustable POI, with user friendly adjustment wheel.

BARRELS ARE SILVER SOLDERED

TRIGGER IS ADJUSTABLE IN THREE DIFFERENT POSITIONS.

Dynamic handling, forged and silver soldered barrels with factory guaranteed point of impacted turns the Zoli barrels into the successful key element which shoots where you look. The offset Monte Carlo style stock with the ideal pitch and the slight rollover comb combined with the right or left hand palm swell makes this stock the most customized but still standard stock of all high rib guns.

The success of the Zoli **HR** is at large the tribute to the perfect marriage between stock and barrel.

1) BHB
A device placed in the pistol grip and barrel, designed to personalize the dynamic behavior of the shotgun. (on request)

2) Trigger mechanism
is completely hand-detachable and loaded with powerful coil springs coated with self-lubricant material. All critical parts are titanium-nitride treated for maximum resistance to corrosion and tear and wear.

3) Locking system
This consists of a split, Boss-type locking bolt that precisely matches the locking hooks of the monoblock. It is available in different measures to be replaced after intensive use.

4) Stainless steel firing pin
Unbreakable firing pins allow for dry firing without snap caps

5) Monolithic action, trigger plate and monoblock
The action, trigger plate and monoblock represent the heart of the gun. These components are all made using forged alloy steel.

6) Chokes
Barrels are provided with 5 interchangeable, titanium-coated choke tubes.
